DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 45- 85 are rejected under 35 U.S.C. 102(e) as being anticipated by Padlo et al (7235250) and/or Pablo et al (2004/0076660A1).

Padlo et al discloses a cleaning device having a fabric, wipe, or sponge (par.29, 36,), one enzyme (par.68), a surfactant (par.61), a humectant (par.59), In regard to claim 56 and 59 see par.61, in regard to claim 63 see par.65, and in regard to claims 70 and 72 see par.20, and in regard to the method claims these are merely the natural use of the apparatus.

Response to Arguments

3. **Applicant's arguments filed 6/24/09 have been fully considered but they are not persuasive.**
4. **Applicant states that the rejection is invalid.**
 - a. Applicant states that the rejection is valid because the intended use of the inventions are different. However, in a 102 rejection intended use is not a

Art Unit: 3727

consideration because it is structure that is being compared. The fact that this structure can be used for personal care or cleaning a medical instrument is not point of rejection because intended use and obviousness are concern when making a 103 rejection. The point is if you have shovel it would not matter if you shovel snow or dirt because the structure would be capable of both or either. The problem being solved by the apparatus is not really address in the claims with same detail as the arguments. Applicant arguments are narrower than what is being claimed. A list of elements are being claimed and that same list is shown by the prior art. Even if this were a 103 rejection it would be the position of the examiner that once you make the tool you can use it to clean alot of stuff other than what is said to be used for. Paper towels are shown wiping up spills but they also can used to wipe dust off tables and chairs as well. Therefore, the rejeciton stands.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any
